COMPANY RETURNS

All the figures in the foregoing pages are transcripts of the monthly returns as filed with the Inter-State Commerce Commission at Washington. Many railroad companies also issue monthly statements of their own, and the form of the returns in such cases is often different from that prescribed by the Commerce Commission. In some instances the figures in the two returns correspond, but the company statements go beyond the requirements of the Commission and give fixed charges and income from investments in addition to earnings and expenses.

It is our purpose that each issue of the "Railway Earnings Section" shall furnish an absolutely complete record of all monthly returns, in whatever form issued, that may be put out by any steam railroad in the United States. Accordingly, we bring together on this and the following two pages all the company statements where they differ in any way from the returns to the Commission, or where they embrace more facts than are contained in such returns. In these instances, of course, uniformity is lacking. Each company makes up its statement according to its own conception of what will serve best to convey a correct idea of the course of its income in the distinctive circumstances that may attend its operations or the character of its business. We in turn give the statements in the precise form furnished by the companies. Obviously, we cannot undertake to reconcile differences or discrepancies that may appear between the company figures and the Inter-State Commerce returns.

It should be distinctly understood that where the company statements are identical with those rendered to the Commerce Commission, we do not undertake to repeat them here. In such cases the reader must look for the figures among the detailed statements on preceding pages, which include every steam road that is obliged to make monthly returns to the Commission.

There is just one exception to the rule excluding statements that agree with those made to the Commerce Commission. Where the fiscal year of a company differs from that in the Commerce returns—that is, from July 1—we introduce the road here in order to present the figures for its own fiscal year.

THE INDEPENDENT CAR IN RAILWAY OPERATION.

Besides the larger question of the general entrance of electricity into the railroad field and its formidable growing rivalry to steam as the principal motive agency, the rapidly increasing use of other forms of motive power in small units and as subsidiaries in railway traffic operation is apt to be overlooked. Under the pressure to which even the richest and most powerful railroads have been put during the last three or four years to keep their rolling stock at a strength sufficient to cope with the needs of their passenger and freight traffic, little initiative work in experimenting with new kinds of cars or trains could be encouraged. With the return of steady prosperity and the placing in service of a satisfactory complement of standard locomotives and cars, attention will doubtless be specially directed to the small-unit motor engine and the many different types of self-propelled light cars suitable for railroad work. It will then be realized how much has been accomplished on small private railroads in mines, mills and factory yards, where locomotives of a few horse-power traction ability and trucks of from 5 to 20 tons' capacity are employed, and by contractors in temporary rail work. Coincidently with the double-tracking along their main line systems by the great railroads, the building up of branch and subsidiary feeder traffic by the most economical operation will occupy the minds of the railroads' engineers and traffic superintendents. For many years to come the steam locomotive, though of an old-fashioned type, may still find in not a few localities a useful place where it could not be supplanted with advantage. The unit motor-car, however, and the train made up on the multiple-unit system—whether electricity be employed either by the storage battery principle or communication be had by trolley or third rail, or by any of the internal-combustion engines now before the public—have already become strong competitive rivals of the steam engine.

In the wide level areas of the Middle West the gasoline motor car designed for passenger service has made its special habitat. Here it has no frequent severe grades to encounter, as in the Eastern States. Were narrow-gauge railways more in use in the United States corresponding to the development of such lines in Germany, South America, South Africa and elsewhere, more would have been heard of these useful internal-combustion-engined cars. English manufacturers are devoting considerable attention to the development of the petrol locomotive in the industrial field. Engines that have been sent to the North of Africa are of about four tons' weight and capable of hauling a gross load of 14 tons on the level at a speed of 6 miles an hour and the same load up a gradient of 1 in 50 at 3 miles per hour. For another Government line a duplex or double-ender petrol industrial locomotive has been designed which works on petroleum, using about 0.8 lb. per horse power on full load. More than 1,100 of one particular type of these petrol locomotives are in use and have shown good efficiency, being economical in fuel as well as reliable and convenient in service.

Small railways in the Western and Southern States, interurban or feeder branches of trunk lines, have found the gasoline motor car to compare very favorably with the steam train on the score of expense. The fuel expense is far less and operating cost for satisfactory service has been brought from 6 to 8 cents per mile, this including fuel, lubricating oil, supplies, minor repairs necessary, &c. One type of enclosed passenger-service gasoline motor car is popular in its operation in Ohio, Indiana, Alaska, Florida, Texas, Hawaii, Louisiana and Georgia. This car is built for the ordinary gauge, seats 35 passengers, is 34 feet 2 inches long and 8 feet 6 inches wide, weighs 26,000 pounds and attains a maximum speed of 30 miles per hour, depending upon the road-bed, grade and traffic conditions.

In estimating the relative merits of internal combustion and steam motors it does not appear that either one has any decided advantage over the other in all cases. The simplicity of the steam engine and mech-

anism, and its simple control and adaptation to varying conditions, still give it superior advantages which practical men are loath to let go. Both types will probably find their appropriate spheres, from which the storage-battery car with its additional complex machinery for the application of power and greater cost will find it hard to oust them. The Cuban Railway on which the new Edison storage-battery three-car train is to be used will offer a fair test of the battery's capacity in long-continued practice. If the claims made for the train are at all substantiated we may expect to see the storage-battery car playing a great part in the branch lines the operation of which it is so often hard to conduct so as to cover the cost.

It is in construction and maintenance-of-way work, however, that the internal-combustion engine has found a scope peculiarly its own, in relation to railway tracks. Handiness, lightness, easiness of management, run-about and labor-saving qualities have given it merit marks above those of its competitors. The old familiar truck pumped by the eight men it carried to their section of track to be repaired is being replaced on the chief roads by the gasoline section motor car. Twelve years ago a Michigan inventor applied the gasoline motor engine to the hand-worked truck giving seats to three persons. Later models are lighter and improved, but the type of present-day practice is substantially the same. Its progress in recognition was slow, for the track-layer is averse to changing his customs and is apprehensive of machinery that may in first appearances diminish the daily wage fund. The improved all-steel track-inspection car has been thoroughly tested in the three years of its use. Its frame is pressed from one piece of steel and the engine is two-cylinder, two-cycle, air cooled and directly connected to the front wheel. Engine and seats are placed over the wheels on one line, the whole structure being carefully balanced with the corresponding wheels on the other so as to make it easy to remove the whole truck from the track by hand-lifting, though an extremely simple device of a portable turntable can be carried to expedite even this derailment. The weight of this car is 400 pounds.

The one-man car is another auxiliary motor car whose utility has given it much popularity with section foremen and in departments of railroad service where it is required to get from one point to another between the running of regular trains. It runs either way up to about 20 miles per hour, weighs about 320 pounds and seats one or two persons. As it has no complicated machinery a workman has as little difficulty in mastering its operation as the owner of an ordinary motor car.

The section-gang car, again, by itself or used with a trailer, has become standard on many railroads. This has a six-horse-power, four-cycle gasoline engine, giving a maximum speed of about 25 miles an hour, with a weight of 1,200 pounds. Two are found sufficient for covering 30 miles of track, doing work formerly handled by four crews with hand-cars. Comparison gives a saving in time of 110 minutes per man per day, the efficiency of the work being increased by the men arriving fresh at their work. Reduction in the expense of track maintenance by the use of such cars is calculated to produce a saving of from $35 to $50 per month per car in regular section work.

There are many thousands of these gasoline motor cars in service to-day. Improvement in detail and experience in their use have given them a degree of trustworthiness corresponding to the development of the road pleasure automobile and business motor-truck, so that less and less is heard of break-downs and uncertain action. For signal-maintenance work, telegraph and telephone inspection, equally with track-supervision, the rail motor car has been found a subsidiary of the greatest value in the rolling stock equipment of the railroads.

For the minor official the inspection or emergency motor car has taken the place of the heavy spare locomotive waiting with steam up and unemployed crew for the sudden call. The expense and delay of a special train holding up ordinary traffic have been obviated and for the road superintendent or road master and his assistant the rail motor car is the equal of the special saloon car of the President of the road or Chief of Division.

In minor railway-wheeled equipment, the electric baggage truck has fairly established itself at great city terminals. Its use is rapidly extending and several of the foremost railroads have lately placed repeat orders, largely increasing their stock of these useful vehicles. On the platform the electric battery-driven truck, easily handled by the baggage master to convey heavy trunks from the baggage car to the delivery wagon, has many advantages, owing to the simplicity of its mechanism and the absence of noise and smell. In the next few years the equipment of the railways with such handy vehicles for short-haul purposes may be expected to become universal.

THE RAILWAY SAFETY MOVEMENT.

In railway affairs hardly anything just at present is more notable than the work undertaken by the railway companies themselves to lessen accidents by an earnest campaign to promote safety habits. It is particularly interesting to know that the initial work of the Co-operative Safety Congress, recently held at Milwaukee, is to be continued on a thoroughly organized permanent basis. A national organization to be known as the National Council for Industrial Safety will endeavor to knit together railways of every kind, steam and electric, in the common object of safeguarding the public and reducing the liability to injuries ever surrounding the railway workmen. The Association of Iron and Steel Electrical Engineers deserves great credit for taking the lead in bringing into public notice the vigorous action that has already been taken by some of the great railroads. It has been a year of exceptional disasters, both on land and sea. Excessive speed is the cause which has struck the public imagination. Railway authorities have done well to take the opportunity of drawing the lesson, both for the public and themselves, that "Safety First" is the chief desideratum in travel. What is being done for the prevention of accidents under the Government regulations was described at the Congress by Mr. C. C. M'Chord, member of the Inter-State Commerce Commission. Necessary as are such compulsory measures, the very rigidity of Government supervision is apt to rob the workman of the faculty of self-protection. Bound round with rules, the railway operator may be-become indifferent and careless of danger, which would not be the case if he were solely dependent on the primary instinct of self-preservation.

More promising is the spontaneous action of the railroads in directing the safety education movement. The Westport and other wrecks have shown all too plainly that the existing rules have been violated and orders disobeyed. Blame for the loss of life has been shifted from one quarter to another. In cases where

there is a doubt, there is a tendency to attribute the accident to unavoidable human error, even where the cause is simply personal carelessness. The labor unions, in defence of their members, on their side, throw back the charge upon the management for defective plants. The meeting, therefore, at Kansas City a short time ago, of officers and employees of several railways is a remarkable sign of the spirit at work, infusing all ranks for internal reform. Doubtless, in circles outside the railways proper, the Indiana Railway Commission, in making the subject of safety the main theme of its annual convention, will set the example for other authorities supervising railway administration and operation.

To city street railways must be ascribed the credit of starting generally the education of the public in safety knowledge and by the inculcation of safety habits, as in the boarding and getting off of cars. In an age of hurry, this giving of simple advice, which might otherwise seem superfluous, has been found to be necessary; and, it is claimed, has brought about a diminished ratio of accidents. The annual returns of a company's claims department afford as good a test as any of the value of such educational work, and the cases are not few in which definite good results can be traced. The same experience is now being quoted by the steam railroads. During eleven months of the last fiscal year, for example, the claims department of the Santa Fe reported a reduction of nearly $250,000 in claims paid on the entire system, as compared with the whole of the previous fiscal year. Altogether, there were fifty fewer persons killed and 1,363 fewer persons injured. These results were in a large measure due to a safety campaign instituted by the claims attorney of the company for the purpose of persuading the employees to get the "safety habit." In the year there were 18 fewer fatal accidents to employees on the lines east of Albuquerque and 1,146 fewer injured on trains or in shops.

The work of the safety committees through which railways are carrying on this safety campaign was fully explained to the Milwaukee Congress by Mr. A. Hunter Boyd, chairman of the general safety committee of the Baltimore & Ohio, and by Mr. S. M. Braden, General Superintendent of the Chicago & North Western. On the Baltimore & Ohio between three and four hundred men are acting as safety missionaries, such safety committeemen being found more influential in reducing the number of accidents than elaborate sets of rules. The adjustment of couplers by hand or foot is the cause of a large proportion of injuries sustained in train operation, no fewer than 209 employees being killed and 2,966 injured while coupling and uncoupling cars. The B. & O., in consequence of the work of its safety committeemen, had the satisfaction of reducing the coupling accidents which caused loss of hands or feet from eleven cases in the first three months of the year to two in the next three. Similarly, the Chicago & North Western, by a careful tabulation of casualties during the 19 months ending July 1 1912, corresponding to the previous 19 months, can point to a decrease of 27.8% in the number of persons killed and of 31.2% in injured. During the same period the number of trainmen killed was reduced by 55% and of injured by 44.1%.

As it led the way in an effective crusade to reduce the evils of trespassing on railway tracks—a very fruitful source of personal injuries and loss of life, entailing great expense to the railways—the Pennsylvania Railroad has gained another distinction in calling for a halt to the speed craze. It has forbidden its engineers, in making up loss of time, to run at more than 70 miles an hour, a speed which, it may be inferred, is now not infrequently exceeded with the powerful locomotives of the newest build under favorable conditions.

The same railroad has shown the possibility of reducing the loss due to industrial accidents, which in the aggregate has been estimated at $25,000,000 annually. By introducing safety devices and conducting a campaign of education on lines of safety, the Pennsylvania was able to lessen the nymber of serious accidents to its employees by 63%. The whole discussion following a paper on "Prevention of Accidents in Railway Shops and Engine Houses," read by George Bradshaw, describing the methods pursued by the New York Central RR., contained many suggestions which, if generally acted upon by the railways of the country, must remove to a large extent the reproach to which they are now often subjected.

RAILROADS AND WATER CARRIAGE CONNECTIONS.

Issues of profound national importance are wrapped up in the inquiries started by Congress last session into the relations of railroads with transportation by water. When the House Committee on Merchant Marine and Fisheries first took up the investigation of the shipping trust under wide undefined terms of reference, it could not be foreseen that the committee would be led to explore well-nigh the whole theory and practice of transportation by land and water. Yet this is what apparently it is attempting to do, for one set of inquiries has been followed by others of extended scope, so that not only steamship lines but now the railroads have been deluged with questions upon intimate details of the business of railroading. If the information thus collected and placed at the disposal of the public lead to the enlightenment of legislators, who have displayed lamentable ignorance of the fundamental principles of transportation, well and good. The first effect of recent Congressional inquiries, however, as expressed in the Panama Canal Act, seems to have been to check the energies of the railroad companies, restrict their operations to limits which they had passed in natural development, and, through fear of undue aggregation of capital and its use in bulk, throw the railroad administrators back to uneconomical methods of operation that had been outgrown.

Whatever may be the trend of Government policy in railroad legislation indicated by these inquiries, it is perhaps as well that attention be directed to the complexity of modern railroad operation in the interrelation of land and water carriage. Would-be legislators, after having the facts put before them in the bearings and investigations proceeding everywhere, must sooner or later be confronted by the simple question: Where does the service of a railroad begin and end, and is it good public policy to say to the railroads, "Here you shall come and no further"? Counterbalancing advantages in the public interest must be very plainly shown if the effect of the curtai ment of railroad service, as was stated in the annual report of the New York New Haven & Hartford RR. Co. by President Mellen, is to deprive the New York receivers of a better delivery of goods through the company's subsidiary water lines than cou d be given by sole dependence on its land transportation. In this case the operation of subsidiary water lines yielded little or no profit to the railroad company, and the

shipper and the public gained the benefit of a service the expense of which was borne by the whole system of the railroad to give greater utility and efficiency, The company could afford to part with an unprofitable part of its service, the public being the sole loser. It is conceivable that in cases where the enterprise of a railroad is encouraged by reasonable profits, the public might be a severe sufferer by the compulsory divorce of the railroad from its subsidiary concerns feeding its traffic or through the segregation of the interests interdependent upon its activities.

These considerations are suggested by the action of the New York New Haven & Hartford RR. Co. in separating from itself its steamship properties in compliance with the provisions inserted in the Panama Canal Act. President Mellen in the annual report of the company gave particulars of the subsidiary steamship companies which the New Haven has from time to time acquired and utilized in water traffic along the Sound as an alternative to its land lines. Details of finance and material property were given which in great part meet the questions on which the Alexander committee of Congress sought information. But that committee went a great deal farther than asking for knowledge upon the relations between the railroad proper and its steamship lines. It wishes to have at its command full particulars as to the interest in terminals, in dock and wharf properties, warehouses connected therewith, and in the operation of marine equipment in ports of the lake or seaboard. How far the railroads exert control over the dependent companies conducting these supplementary organizations is one of the objects of the inquiry. Much of the information acquired by the committee will no doubt be interesting. But it is more pertinent to know if the real object of these investigations is to enact laws limiting the operation of the railroads in the direct management of these auxiliary concerns. It is easy to foresee, if such is the case, that a serious check may be given to transportation developments. If the effect of the segregation of properties is merely a nominal transfer of control, and the companies organized to take over the administration of shipping, docks and terminal facilities are but the agents of the railway companies, though not ostensibly, the net result will be small indeed. By the nature of the case, the railway field is a narrow one for the creation of competitors such as seems to be expected in other industries which have been disintegrated by law. The multiplication of cogs unnecessarily is hardly likely to make for efficiency and economy in railway transportation.

One cannot take this prospect seriously. Adverse legislation of the sort is likely to be found invalid or be speedily repealed on account of its injurious consequences. That the railways are not being deterred from embarking on new undertakings required in the natural course of their development is seen in several instances. The purchase of a site on the water front at Oakland by the Atchison Topeka & Santa Fe for a freight terminal may be cited. Piers, car-floats bridges and an industrial reserve are included in this project. The North Pacific ports, San Francisco, Portland, Seattle and others have schemes of waterfront terminal improvements under way in which the railroad companies serving those localities are necessarily co-operative factors. Against the free hand enjoyed by their Canadian rival ports, fostered and created by the Canadian Pacific and the Grand Trunk Pacific, these cities will not allow themselves to be hampered. In the seaports of the South and of the Gulf the same conditions have arisen, quickened by the approaching completion of the Panama Canal. From Galveston and the minor budding ports of Texas round to Charleston and Norfolk, the coast communities are anxiously seeking means of bringing sea and land transportation into closer affiliation. President Finley of the Southern Railway makes special remark in the recent annual report of the company of the regular steamship service established between Mobile and New Orleans and the great ports of South America. The railway agents are soliciting traffic for these lines, and the success that has already attended their efforts, says the report, encourages the hope that similar service may be established from other ports served by the company's lines.

What is being done at the greater North Atlantic ports for the improvement of transfer freight terminals at tidewater is matter of common knowledge. Philadelphia, Boston and New York—the last lagging simply from the magnitude of its conceptions and designs—are already committed to the outlay of scores of millions of dollars both of private railway and of public capital guaranteed by the national, State and municipal authorities. To prevent useless expenditure and to exercise a wise prevision for future needs, full co-operation between the public's representatives and those who administer the railroad companies is absolutely essential. To obviate congestion at these chief rail nerve-centres and to facilitate distribution, union stations, freight as well as passenger, belt lines used indiscriminately by the cars of all companies, with classification yards and other accessories of the modern terminal system, are being planned or enlarged. The connecting line round New York and Brooklyn which will link eventually with continuous rail the industries of New England and Pennsylvania is likely to have many subsidiary lines joining it to the water-front terminals of the port. Of these there are already eight At least half a dozen more are contemp ated in the metropolitan area, which includes Newark and some of the busiest manufacturing towns of New Jersey close to the Hudson terminals of the trunk lines reaching New York on this side. The New York harbor terminal property of the Pennsylvania, Erie, Lehigh Valley, Jersey Central and Lackawanna is assessed for the land tax of New Jersey alone at $41,100,000. It is estimated that the value of tracks, ferries, docks, bridges and other structures would reach at least $90,000,000 more.

The intricate complexities that have grown up among the various transportation agencies employing these investments for a common purpose cannot be easily snapped, cut, or even disentangled, without great resulting confusion and loss. How the various railroad corporations immediately concerned will deal with the situation that confronts them will depend upon individual circumstances. The Southern Pacific, controlling the Pacific Steamship Mail and other coast lines, may find its problem essentially different from that of the New Haven. Repeal of restrictive legislation, hastily passed at the fag end of a session of Congress, may to some roads appear the only solution. To others more hope may seem to lie in an appeal to the Inter-State Commerce Commission for a dispassionate review of the case, if that body, invested as it has been with powers of ever-growing magnitude, can hold the scales even between the claims of local shippers and the particular railroad systems seeking to earn profits that may help their development while providing public carriage satisfactory to the community they serve as a whole. The strongest argument on which a railroad will have such an appeal to the Inter-State Commerce Commission will be that it cannot, either in its own interests nor in those of the shippers whom it specially serves, acquiesce in a position where it would be barred from expansion along the lines of modern methods of transportation employed in Europe, and other countries of North and South America, and likely to be followed on the opposite shores of the Pacific. So urgent are the present necessities of the railroads that the settlement of the question relating to the relation between the land and water operations of the railroads should be made as soon as possible. Two considerations may advance it: that there is an increasing disposition to bring rail and water carriage into closer connection with one another as co-ordinate and not opposing means of transportation, and that, however the development of the railroads which have helped to build up the country may be impeded, it cannot be permanently arrested.

BONDS.—In April 1909 the holders of bonds of various issues (marked "x" above) were offered the option of exchange for general mortgage 4% bonds on certain terms. V. 88, p. 1060, 1127, 1559; V. 89, p. 40, 720, 1141. The general mortgage bonds ($300,000,000 auth. issue, interest not to exceed 5%) are a first lien on about 3,401 miles of road, and on retirement of the outstanding underlying bonds, for which bonds are reserved as below noted, will be a first lien on the entire mileage owned, aggregating 8,599 miles. The generals have been issued or are issuable as follows (see V. 86, p. 1342, 1466; V. 88, p. 504, 685; V. 92, p. 525):

To retire outstanding bonds (incl. $17,428,300 in sink. fds.)	$177,000,000
Issuable for reimbursing the treasury for outlays already made by it for betterments and additions ($22,000,000 sold)	45,000,000
Issuable for additions, improvements and betterments of and to the mortgaged property (of which $13,724,000 sold)	78,000,000

In Jan. 1909 $20,000,000 general 4s were sold, of which $13,724,000 were used to purchase $23,657,000 Colorado & Southern common stock, and in Feb. 1911, $8,000,000. V. 88, p. 685; V. 92, p. 525.

The *Iowa Division* bonds are a first mtge. on the main line in Iowa from Burlington to East Plattsmouth, on the Missouri River, 272 miles, and on 621 miles of branches and 86 miles of second track. These bonds have a sinking fund of 1½% ($203,800) yearly, for which the 4s are subject to call at 100 and the 5s at 105. The single main line and branches covered "shall not exceed in the aggregate 900 miles," at $16,000 per mile; on second track additional $14,000 per mile. V. 65, p. 462.

The *Nebraska Extension* bonds of 1887 are issued at $20,000 per mile for single and $10,000 per mile for second track on not exceeding 1,500 miles. Now a direct first lien. Abstract of deed, V. 45, p. 441; V. 85, p. 721.

Burlington & Missouri RR. in Nebraska consol. mtge. of 1878 is now a 1st M. or 1st coll. lien; they are subject to call for the sink. fund at par.

HISTORY, LEASES, &c.—In August 1902 the St. Louis & San Fran. acquired the greater part of the stock, as said below. In 1911 merged the Evansville & Terre Haute, theretofore controlled. See STOCK below.

The Chicago & East. Ill. owns $1,000,000 stock of Chic. & Western Ind.

STOCK.—Common stock outstanding was $7,217,800 ($15,000 per mile); preferred, $8,830,700. In addition, $6,408,300 common was held in trust by Trust Co. of America in July 1912 as a part of "trust assets" under agreement dated July 1 1905, for improvements, acquisitions or refunding, to be terminated on satisfaction of the St. L. & S. F. stock trust agreements below referred to. V. 85, p. 1001.

Stockholders voted July 1911 to increase the authorized preferred stock to $15,000,000, to merge the Evansville & Terre Haute and Evansville Belt, the E. & T. H. common to receive 83 1-3% in C. & E. I. preferred and the Evansville Belt stock par, calling for $3,209,300 pref. and increasing total amount of pref. issued to $12,201,300; remainder reserved for new mileage at $10,000 per mile. V. 92, p. 1374, 1435; V. 93, p. 229, 588.

The St. Louis & San Francisco RR. has given in exchange for the common and pref. stock its stock trust certificates at the rate of $100 thereof for each $100 share. V. 75, p. 289. All of the $7,217,800 common, and in June 1912 $8,276,000 of the $12,146,500 pref. then outstanding, had been exchanged on this basis. The St. L. & S. F. has the option to retire the trust certs. at any time at $250 per $100 com. stock trust certificate and $150 per $100 pref. stock trust certificate, payable in gold, and obligates itself to pay off entire issue in 40 years from July 1 1902 at same rates, meanwhile obligating itself to pay 10% dividends on the com. and 6% on the pref. trust certificates, respectively, these amounts being equivalent to 4% on the principal sum to be eventually received in payment therefor. Upon failure to pay any dividend within 30 days after demand therefor, any holder may surrender the certificates to the trustee and receive the shares represented thereby. V. 75, p. 289, 393, 1031; V. 82, p. 48. A majority of common stock trust certificates were in 1905 exchanged for certificates in denominations of $1,000 each, representing 4 shares of common stock, bearing 4% int., and payable in 1942 at face value. See form, V. 80, p. 1856.

V. 90, p. 1675; V. 93, p. 229; V. 95, p. 889; this suit has delayed reorganization. Foreclosure decree under consol. M. was signed Oct. 8 1912, sale to take place by Jan. 1 1913. V. 95, p. 968.

Security-Holders' Committee.—Charles H. Warren (Chairman), Charles D. Backus and Alfred Shepherd (W. W. Stevenson, 34 Nassau St., Sec. Bankers' Trust Co., New York, depositary.)

PLAN.—The plan of the above committee, declared operative Oct. 26 1909, provides that a new co. shall acquire the road after foreclosure, subject to the $2,000,000 prior lien mortgage of 1900. The committee is given power to sell in the common interest.

The plan (V. 89, p. 285) authorizes an issue of $15,000,000 "general and refunding" 30-year gold 4½s. Present issue, $2,850,000, of which the $1,100,000 issuable in exchange for the old consols and unpaid coupons are to bear only 3% interest for the first 6 years. For six years the new bonds are to be subject to call at par on any int. date on 60 days' notice; thereafter at 107½. Of the bonds, $2,000,000 will be reserved to refund prior lien bonds and $150,000 to aid in refunding, and $10,000,000 for extensions, &c.

100 Common stock	3,600,000	3 00	3 00	9 00

*Interest on these bonds reduced to 3% for first six years.

Out of the $2,850,000 "general & refunding" 4½s, $850,000 will be placed in the treasury, and it is estimated that after providing for the floating debt the new company will have free treasury assets in cash and "general and refunding mortgage" bonds of over $1,000,000 to make needed improvements.

The new company will have a fixed annual charge of about $154,000 for the first 6 years, which will be thereafter increased about $15,000 by the increase in rate from 3% to 4½% on the new bonds exchanged for old cons.

Security-holders who prefer not to make a cash payment as above provided are offered in new stock at face value voting trust certificates for $1,000 income mtge. bonds, $60 in new stock; for $100 pref. stock, $4 in new stock; for $100 common stock, $2 in new stock.

HISTORY.—On Dec. 1 1895 succeeded, per plan in V. 61, p. 368, the N. Y. Lake Erie & Western RR. Co., sold in foreclosure under its second consolidated mtge. The company holds in fee or through ownership of all or practically all the stock of the subsidiary companies the line from New York to Chicago (including the Nypano RR. and Chic. & Erie companies).

COAL AND STEAMBOAT PROPERTY.—The *Erie* coal properties represent an aggregate of 12,400 acres of anthracite, of which about 9,000 acres are held in fee; also 53,000 acres of bituminous coal lands held in fee, 14,000 acres of bituminous held under mineral rights. Its coal and coke tonnage in the year 1911-12 aggregated 17,680,518 out of the 36,961,686 tons hauled. The Union Steamboat Line (merged in Erie RR. Co. June 30 1896) has terminal, &c., properties in Buffalo and 8 lake steamers. See V. 63, p. 514. The *Penn.* coal properties acquired in 1901 are additional. V. 82, p. 1322.

STOCK.—Prior and general lien bonds of 1895 have 10 votes for each \$1,000 of principal, their authorized issues aggregating \$175,000 000, of which \$84,724,000 issued t July 1912. Provisions of preferred stock were in "Supplement" of April 1897, page 3. V. 66, p. 335, 573.

BONDS.—The new first consolidated mtge. is for \$175,000,000 (Farmers' Loan & Trust Co., trustee)—see abstract of deed, V. 62, p. 89, and secures \$35,000,000 prior lien and \$140,000,000 general lien bonds. Both series have voting power; see "Stock" above; also issue of Feb. 1912.

Of the \$140,000,000 *general lien bonds*, \$92,668,000 were reserved for the ultimate acquisition of bonds and guaranteed stocks left undisturbed on various parts of the system (see list, V. 62, p. 89), and \$17,000,000 were reserved for new construction, betterments, additions, &c., after 1897—not over \$1,000,000 to be used in any one year. In July 1912 \$35,885,000 general lien bonds were in hands of public, \$13,839,000 additional being deposited under collateral trust notes—see below.

The collateral trust 4s of 1901 are secured by 51% of the entire N. Y Susq. & Western stock (\$26,000,000 total issue), all of the Pennsylvania Coal Co. stock, and the stock of the Erie & Wyoming Valley RR., Scranton, Pa., to Lackawaxen, 65 miles, and Delaware Valley & Kingston RR. A sink. fd. of 10c. per ton of coal mined purchases bonds at not exceeding 105; otherwise to be applied to the drawing of bonds by lot; all such bonds to be kept alive and the accruing int. thereon to be added to the sinking fund, which, it is estimated, will be sufficient to retire the whole issue at or before maturity. V. 71, p. 1219, 1311; V. 72, p. 44, and circular, p. 136, 532, 257; V. 79, p. 212; \$4,525,000, included as outstanding, are in sinking fund.

The conv. 4s of 1903 (\$50,000,000 authorized issue) will be issued from time to time as required and may be made convertible into com. stock at a price to be fixed when the bonds are issued, but not less than \$41⅔ per share; they will cover all the company's property subject to underlying liens. The first \$10,000,000 (series A) issued for improvements and equipment is convertible on basis of \$100 bonds for \$200 stock to April 1 1915.

Series B bonds for \$12,000,000 are convertible into common stock at \$60 per share at any time since Oct. 1 1907 and before Oct. 1 1917. V. 76, p. 382, 541; V. 78, p. 768; V. 79, p. 2205; V. 84, p. 270.

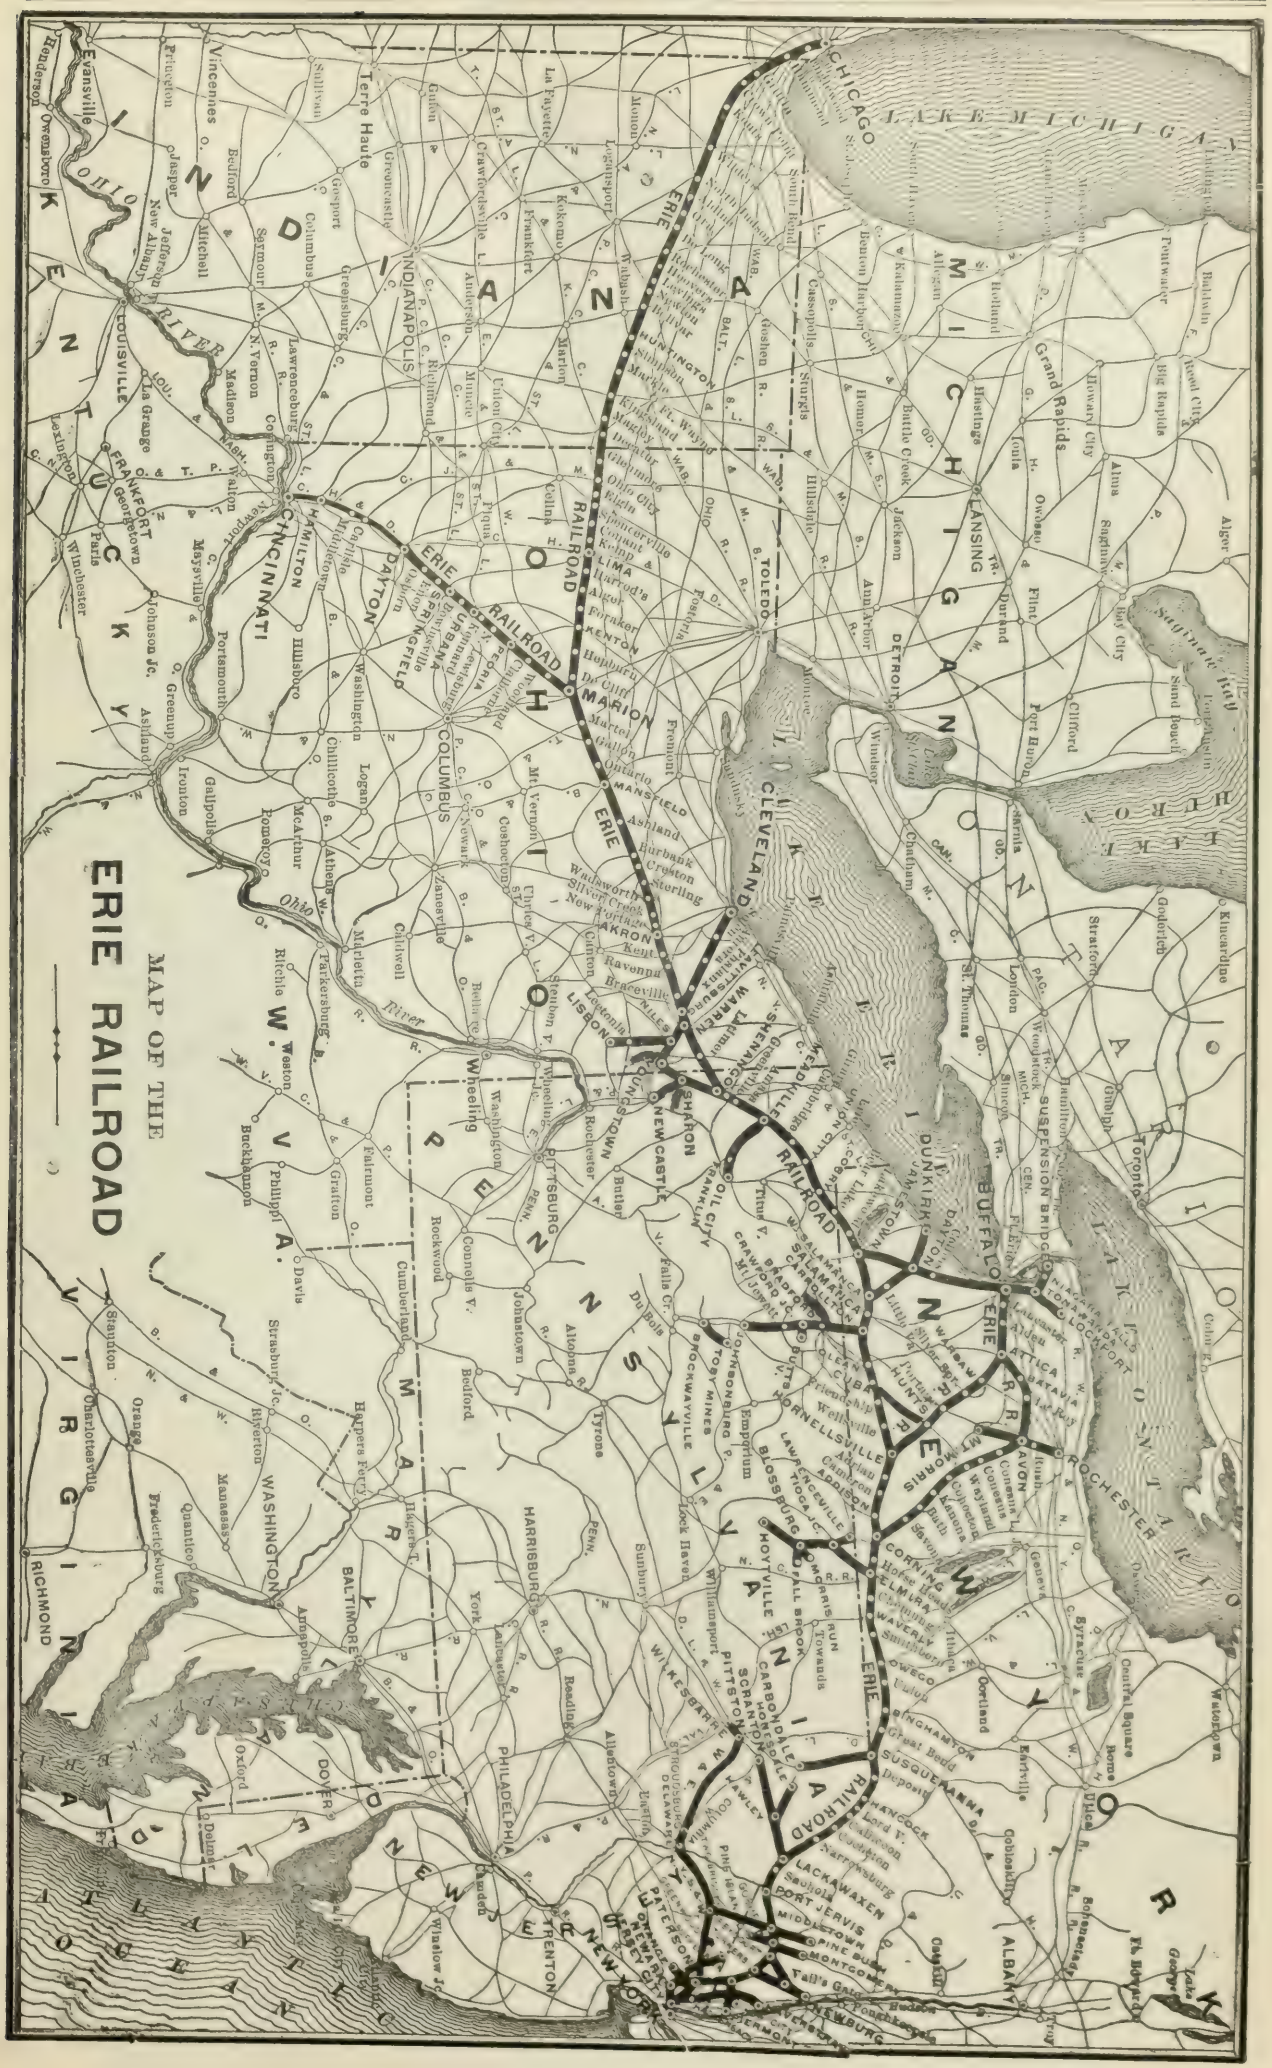
The Erie & Jersey RR., with \$600,000 auth. stock, completed in Jan. 1909 a low-grade cut-off from Highland Mills via Campbell Hall to Guymard, N. Y., about 40 miles. In Oct. 1911 \$4,550,000 3-year 5% notes were sold, secured by \$4,000,000 E. & J. bonds (auth. issue \$10,000,000 1st 50-year 4s) and \$3,000,000 Genesee River 1st M. 4s to retire the \$3,000,000 extended Erie & Jersey notes due Dec. 1 1911 and maturing notes of Genesee River RR. V. 93, p. 940, 1 22.

In June 1907 the Genesee River RR. was authorized to make \$6,000,000 mtge. covering road from Hunts to Cuba, N. Y., 32.9 miles, completed Oct. 1910. See paragraph next above. V. 84, p. 1366, 1488; V. 81, p. 777.

The \$12,500,000 6% coll. notes of 1911 are secured by \$12,839,000 Erie "general lien" bonds (additional to the amount shown above as outstanding); \$985,000 Erie convertible bonds, ser. "B," \$336,000 Erie RR. Pennsylvania collateral bonds, \$217,000 Chic. & West Ind. consol. 4s, \$95,000 Mutual Terminal Co. of Buffalo 4% notes, \$6,306,000 N. Y. Susq. & West. pref. stock, \$163,100 Lehigh & Hudson Riv. Ry. stock and \$145,700 Temple Iron Co. stock. V. 92, p. 594.

The \$10,000,000 3-year 5% collateral notes dated April 1 1912 are secured by deposit of \$10,000,000 convertible 4% bonds, series C, due April 1 1953, \$1,000,000 gen. lien 1st consols, \$3,000,000 Erie & Jersey RR. 1st 50-year 4s and \$2,000,000 Genesee River 1st 50-yr. 4s. The deposited securities can be released only on payment to the trustee of the withdrawal values, viz.: 70% for the gen. M. and Genesee River 1st M. bonds, 80% for the 1st consols and 75% for the Erie & Jersey 1st M. 4s, the proceeds to be used in the purchase and cancellation of the notes at not above par. V. 94, p. 982, 630, 1056, 1118.

In June 1912 \$450,000 5% serial notes were sold to purchase ore-unloading and handling plants. V. 94, p. 1695.



Car Trust Series, Gold (Denomination \$1,000 each). *See V. 88, p. 882.*

FINANCES.—During the year ending July 1 1909 maturing coupons to a total of about $6,000,000 were purchased on behalf of the company by J. P. Morgan & Co. in order to place the road in position to complete needed improvements and additions. The coupons so purchased were pledged with other collateral to secure about $14,000,000 of 6% notes due April 8 1911. These notes were paid at maturity in 1911 and $12,500,000 new 6% notes were issued (see "Bonds" above), without the coupons, as part collateral. The financial plan as originally contemplated in 1908 called for the creation of a large car trust and the issuance of $30,000,000 bonds to take up the first-named note issue and to fund coupons maturing on the prior lien bonds and general lien bonds during the five years ending June 30 1914. STOCK.—Authorized, $45,000,000 (par of shares, $100 each), of which the $25,000,000 common is owned by the Grand Trunk Ry.

BONDS.—The Canadian Government agreed to guarantee 3% 1st mtge. bonds for an amount up to 75% of the cost of construction of the Western division, such amount (*a*) in the case of the Prairie Section not to exceed $13,000 per mile, or £3,210,000 in all; and (*b*) three-quarters of total cost per mile from the mountains to Pacific Coast, called Mountain Section. Total issue, £14,000,000; Royal Trust Co., Canada, trustee. V. 80, p. 996, 1234, 1363; V. 81, p. 507, 613; V. 89, p. 224, 286; V. 91, p. 214, 276. Co. in the proportion of 75% of such earnings to the holders of the Govt bonds and 25 to the holders of the bonds of this division guar. by the Grand Trunk Ry. Co.

Power is given to issue additional bonds up to $2,000 per mile, making $15,000 per mile. V. 90, p. 1044, 1165; V. 88, 1437.

In 1912 an Act was passed authorizing the Province of Saskatchewan to guarantee, prin. and int., at the rate of $13,000 per mile of 4% 30-year bonds, debentures, debenture stock or other securities to be issued by the Grand Trunk Pacific Saskatchewan Ry. for the construction of new lines, pat to be completed by Dec. 31 1912 and part by Dec 31 1914. New Lines.—In May 1912 the city authorities entered into agreement with this company (V. 94, p. 1507, 1566) and the Brooklyn Rapid Transit Co., providing, subject to the approval of the court, for expenditures aggregating about $260,000,000 for the establishment of comprehensive dual systems of rapid transit serving all boroughs. For this company the new construction will mean:

The 7th Ave. subway will at its southern end divide so as to reach both the Battery and, (via a new tunnel under the East River to Clark St., Brooklyn, and the present subway,) the Flatbush Ave. (L. I. RR.) depot, whence it will run with 4 tracks along Eastern Parkway to Buffalo Ave., with 2-track elevated extension on Livonia Ave. to New Lots road. Manhattan Ry. is to have third track on 2d, 3d and 9th Aves.

Subway Leases, New and Old, to Run 49 Years—Re-Capture.

Under the terms of the contract the Interborough Rapid Transit Co. will modify its present leases, fixing the expiration of all its subway leases at 49 years from the completion of the new subways, which shall be not more than 4 years from the letting of the formal contracts, with allowance for contingencies. The company will be authorized to take annually during this period from the aggregate net earnings of the old and new subways the sum of $6,335,000, being the average amount of the net earnings during the last two years on the present subway; also the sum of $4,620,000, the equivalent of 5% int. and 1% sink. fund, on the investment by the company of $77,000,000 of new money, viz.: $56,000,000, the company's contribution toward the cost of construction, and $21,000,000, the estimated total cost of equipping the new subways. These payments are to be a first charge on such net earnings and are to be cumulative.

All new lines constructed are after 10 years to be subject to re capture by the city in groups upon paying the company the cost of its investment plus 15%, which sum decreases as the term continues, and the actual cost of its equipment, less sinking fund and deferred maintenance. The new equipment to the extent amortized from the sinking fund to become the property of the city upon termination of lease.

Sale of $170,000,000 *New First Mortgage 53-Year 5% Gold Bonds.*

To cover the company's requirement under the plan there have been sold to J. P. Morgan & Co., and through them to a syndicate, $170,000,000 new 1st M. 5% 53-year gold bonds, to be taken and paid for in four yearly installments, viz.: in 1912-13, $78,000,000; 1913-14, $30,000,000; 1914-15, $30,000,000; 1915-16, $32,000,000. See V. 94, p. 1507, 1565, 1249.

The mortgage securing the bonds will also provide for the issue of such additional amounts as may be needed for extensions and improvements as may be authorized by the city and agreed to by the company during the period of the lease—as provided in the agreement.

A cumulative sinking fund of 1% will begin 5 years from the date of opening the new subway, or in any event not more than 10 years from the date of the bonds. Bonds may be drawn for the sinking fund at 110, or bought in the market at a lower price, and by the operation of the sinking fund the whole issue will be amortized during the term of the lease. The company reserves the right to increase the sinking fund at any time.

Company's Prior Claim on Net Earnings When New Construction Is Completed.

Average annual earnings of present subway during last 2 years	$6,335,000
5% interest and 1% annual sinking fund on $77,000,000, the amount of Interborough's new investment in subways	4,620,000
Interest and annual sinking fund on approximately $30,000,000 new capital invested in elevated railways	1,800,000
Profits from Manhattan Ry. lease and other income, which during the last two years have averaged annually	1,813,000
Total company's prior claim (cumulative) on net	$14,568,000

After the foregoing payments the city will take out 8.76% on its investm't.

Average Annual Earns. Past Two Years and Estimate for Completed Property

[Including Manhattan Ry. lease.]	*Aver. Past 2 Years.*	*—Est. Completed Prop.— First 5 Yrs.*	*4th Year.*
Net available for interest	$8,148,000	$13,038,000	$15,075,000
Deduct—Annual int. on total issue of $170,000,000 new bonds			$8,500,000
Annual sinking fund upon the bonds, which will not begin, however, until 5 years after enlarged system is put in oepration			1,700,000
Total deductions (incl. sinking fund begin. after 5th year)			$10,200,000
Balance, surplus, upon above basis			$4,875,000

Interest during the construction period has been provided for as part of the cost of the work. As indicated above, the company believes that when the new subways are open for operation, the earnings of the property will show from the start an ample margin above all fixed charges.

CONTROL.—In Dec. 1907 $33,912,500 of the $35,000,000 stock had been exchanged for 200% in 4½% collateral trust bonds of the Interborough Metropolitan Co. (which see above), secured by the stock exchanged.

CONTRACTS.—Contract No. 1 with city called for the construction of the road from City Hall north for $35,000,000 and its lease to the company at a rental equal to the interest on the city's bonds issued for construction (but not for easements, &c.), and a sinking fund of 1% yearly to retire the bonds. See provision, V. 82, p. 1157. In Dec. 1907 $5,934,798 was allowed for extra construction. V. 85, p. 1461. The company also at its own expense provided the electrical equipment (costing over $26,000,000; see V. 82, p. 452). For contract see V. 69, p. 1063. The extension from City Hall, Manhattan, to Brooklyn (contract No. 2) was built without aid from the city except about $4,000,000, and leased. V. 86, p. 196; V. 75, p. 184, 1086, 1202. See V. 76, p. 101, 1234. As amended in 1912 the lease is to terminate in 49 years from the opening of the new subways (see above), the city to have the right after 35 years to take over the unexpired portion of leases under contracts Nos. 1 and 2 (see below) upon payment of their then worth, if it shall take over any of the lines under the new contract (of 1912) after 10 years.

DIVIDENDS.—July 1904, 2%; 1905, 8¼%; 1906, 8½%; 1907 to July 1911, 9% yearly (Q.-J.). In Oct. 1911 2½% regular and 1% extra, to bring the disbursements for the past year to 10%. In 1912, 10% (2½% Q-J), and in June 1912 special 5%, mainly from surplus profits of Rapid Transit Subway Construction Co. V. 94, p. 1695.

ORGANIZATION.—Incorporated in Texas on Aug. 10 1911 and has succeeded the Int. & Great Nor. *RR.* foreclosed June 13 1911. The 3d M. bondholders' committee bought up practically all of the 2d M. bonds at par and int. and recapitalization is pending per plan in V. 92, p. 1310, subject to valuation to be fixed by Texas RR. Commission. V. 93, p. 1105. The I. & G. N. Holding Corporation was incorporated in Virginia in Nov 1911 with $5,500,000 capital stock to be used in the reorganization of the railroad company in such a way as to preserve the equity of the 3d M. bondholders in case the Texas RR. The stockholders on Feb. 28 1911 authorized a new "first and refunding" mortgage to secure an issue of $35,000,000 bonds to replace said $12,000,000 mortgage, which was found insufficient for future needs. Of the new bonds, $8,100,000 were made issuable for general corporate purposes, of which $5,837,000 were sold, $4,360,000 of the proceeds being used to retire the collateral notes, the collateral trust indenture and the old first and ref. M. being canceled), $3,130,000 are reserved to retire a like amount of underlying bonds, leaving $23,770,000 available for future purposes, of which $10,000,000, however, will be issuable only upon vote of three-fourths of the directors and a majority of the stock for additional road.

The new bonds are secured by a first mortgage on 215 miles and, subject to underlying issues aggregating $3,130,000, on 293 additional miles, and also by a first lien on practically the entire equipment, valued at $2,309,973; also by a first lien on the entire stock ($1,000,000) and first mortgage bonds ($5,000,000) of the John L. Roper Lumber Co., owning 10 planing, saw and shingle and cedar mills, with an annual capacity of 150,000,000 ft., board measure; and about 150 miles of standard-gauge logging road, 300 logging cars, 25 locomotives, &c. The value of the Roper lumber property has been estimated at $12,785,000. Sinking fund $100,000 yearly, as long as the lumber company bonds are pledged. The lumber company's securities may be withdrawn from the mtge. on payment of at least $5,000,000. All moneys of the sinking fund, including the amount received upon any sale of the Lumber Co. bonds and shares, or upon the redemption of any of said bonds, shall be used, as to at least one-half thereof, for the purchase or redemption of bonds of this issue, and the balance, if any, for the construction or acquisition of new lines, equipment, betterments and improvements. V. 93, p. 1534. The stockholders on July 2 1912 authorized the issue of $5,456,000 additional bonds and the reservation of $851,000 of such additional bonds for the acquisition of the Raleigh Charlotte & South. Ry. and improvements and extensions thereof. V. 94, p. 1186, 1384; V. 95, p. 481.

BONDS.—The first consolidated mtge. of 1896 is limited to $62,500,000, the balance unissued being reserved to retire the underlying bonds. V. 73, p. 502; V. 74, p. 151; V. 75, p. 505; V. 77, p. 1785; V. 78, p. 229. PITTSBURGH & SHAWMUT RAILROAD.—Organized to establish an outlet to Pittsburgh for Pitts. Shawmut & Northern RR., which see below. Is building 102 miles of road from Brockwayville, Pa., to Freeport, Pa., on the Pennsylvania RR., 28 miles northeast of Pittsburgh. When completed, after reorganization of Pittsburgh Shawmut & Northern, is to be merged with the latter; Brockwayville to Ramsaytown, 37 miles, has been completed; of the balance to Freeport, 42 miles was operated for freight in Feb. 1912 and 23 miles was 90% completed.

Freeport is at head of slack-water navigation of the Allegheny River (under plans of U. S. Gov't), thereby forming a water route for freight traffic of the Pittsburgh district to Ohio and Mississippi River points and the Gulf of Mexico. The road completed is leased to Pittsb. Shawmut & Northern RR. Co. at a rental equal to the net earnings of the P. & S. RR. plus 10c. per gross ton on coal delivered by the P. & S. RR. to the P. S. & N.

In 1910 sold $4,000,000 of an authorized $12,000,000 of 50-year 5% gold bonds due Dec. 1 1959, but callable at 105; annual sinking fund, $100,000 beginning Dec. 1914. The bonds are secured on the 79 miles in operation and 22 m. to be completed in spring of 1913 (total, 102 m.); also pledge of $11,953,000 of $14,491,000 ref. 4s and $58,000 of $164,000 Pitts. S. & Nor. 1st 5s outstanding, pledge of entire $3,607,200 Allegheny River Mining Co. stock and two traffic contracts with the Allegheny Mining Co. and Pitts. Shawmut & Northern.

The P. & S. RR. Co. has deposited with the trustee funds sufficient to pay the interest charges on these notes until their maturity. V. 93, p. 45. As to earnings, see P. S. & Nor. RR. below.

DIRECTORS.—Theo. P. Shonts, Wm. H. Taylor, Frank Trumbull, Thomas H. Hubbard, Edwin H. Tait, Harry Bronner and Henry E. Huntington.—(V. 92, p. 188, 463; V. 93, p. 45.)

PITTSBURGH SHAWMUT & NORTHERN RAILROAD.—Operates a road extending from bituminous coal fields in Elk and Jefferson counties, Pa., northerly to Wayland, N. Y., a distance of 152 miles, with branches. Total now operated, 240 miles. The allied Pittsburgh & Shawmut RR. (which see above) has under construction a line running through extensive coal fields (large areas being owned by those identified with the enterprise) to river front in Pittsburgh district. The enlarged system will aggregate 300 miles and will, it is stated, form the shortest and lowest-grade route of any existing line between the Pittsburgh region and central New York and the New England States, via the Erie and the D. Pres. E. E. Tait of P. & S. RR. in June 1911 wrote: "Even on the basis of present partial operations, the gross earnings of the combined railroads for the year ending June 30 1911 will be about $6,000 per mile, which, under normal operating conditions, together with the revenues from the present coal development, would be ample for the payment of all fixed charges of the P. & S. RR. Co. Net earnings for the current fiscal year ending June 30 1911 practically cover the interest on the present investment on that part of the P. & S. RR. now in operation. For the year ended June 30 1913, the net earnings of the P. & S. RR. should be at least $492,000, or well in excess of the present charges, incl. interest on these ($3,250,000) notes."

STOCK TRUST CERTIFICATES.—Kansas City Ft. Scott & Memphis Ry., Kansas City to Memphis, Tenn., with branches, 919 m., was acquired in 1901; its entire stock is owned and road leased for int. on bonds and 4% on pref. stock trust certfs. (see above table), the 4% ref. bonds being guar., p. & l.; see K. C. Ft. S. & M. in this issue and V. 72, p. 438, 532, 581, 1238.

In July 1905 all of the $7,217,800 common and $6,211,700 of the $8,830,700 preferred Chicago & Eastern Illinois Railroad stock then outstanding had been acquired, the St. Louis & San Francisco giving in exchange its stock trust certificates at the rate of $100 for each $100 share, upon which 10% and 6% dividends, respectively, are paid. In 1905 the holders of a majority of the com. stk. trust certfs., preferring to have a security redeemable at par instead of at the rate of $250, exchanged their certfs. for a new form in the denomination of $1,000 each, representing the deposit of four shares of stock. Int. on these latter certfs. is payable at the rate of 4% per annum, so that both the income and prin. are unchanged —only form of security being changed. (See form, V. 80, p. 1857). See Chicago & Eastern Illinois on a preceding page.

They are also a second lien subject to existing divisional mortgages, for which bonds are reserved, on 1,272 miles, and a general lien subject to the first consols on the property covered thereby. See V. 82, p. 397; V. 86, p. 1468; V. 88, p. 565, 626, 1622.

June 30 1912 and $1,000,000 reserved for improvements. *St. Louis Division* mtge. covers the former Lou. Evansv. & St. L. See V. 93, p. 1558.

The Fourteen Independent Companies.

DISSOLUTION PLAN.—On June 13 1912 decree was made by the U. S. Circuit Court of Appeals, providing for disintegration of company and controlled properties, per plan V. 94, p. 1386, 1629, 1698; V. 95, p. 51, 113. The combination (27 cos.) is to be dissolved, the business to be divided among 3 cos. (including the present du Pont de Nemours Powder Co.) in such a way that competition will follow. The 15 plants for the manufacture of dynamite, 19 for the manufacture of black blasting powder, 4 for black sporting powder, 2 for smokeless sporting powder and 2 for Government smokeless powder will thus be apportioned among the 3 companies.

Two new companies have been formed under the laws of Delaware, the Hercules Powder Co. and Atlas Powder Co., respectively, whose assets aggregate approximately $13,000,000 and $7,000,000, respectively, which, in consideration of the properties assigned to them, will issue to the du Pont de Nemours Powder Co. their entire capitalization, viz.: $13,000,000 and $6,000,000, 50% being in bonds (non-mtge.) maturing in 10 years, bearing int. at 6% only if earned, and the remaining 50% stock. The whole of the said stock and one-half of the bonds received is to be distributed among the stockholders of the du Pont company, one-half of the stock received by the 27 defendants to be stock without voting power, so that they will not have sufficient voting stock to control either of the two new cos.

The company in Oct. 1912 offered the holders of its $16,000,000 4½% bonds of 1906 the right on or before Dec. 1 to deposit the same for exchange of not over $10,000,000 thereof (pro rata in case deposits exceed that amount) on or about Dec. 16 for $9,000,000 bonds of the new companies on the following basis:

$9,000 new 6% 10-yr. gold bds. (call. at 102 & int.), viz.: } For each $10,000
$6,000 Hercules Powder Co. bonds at par } Dupont 4½s
$3,000 Atlas Powder Co. bonds at par } of 1906.

Depositors will receive checks for the int. due Dec. 1 on deposited bonds and one month's int. (to Jan. 1) on the new bonds. The new bonds so issuable (Hercules, $3,250,000; Atlas, $1,500,000) have been sold subject to this option. V. 95, p. 969.

The E. I. du Pont de Nemours Co., the Hazard Powder Co., Delaware Securities Co., Delaware Investment Co., Eastern Dynamite Co., California Investment Co., Judson Dynamite & Powder Co. and Laflin & Rand Powder Co.) will be dissolved and their properties be distributed among their stockholders.
